

# Welcome Pack

# Welcome!

# Together

as part of our  
community you can...

- **Amplify your visibility nationally and globally:** connect with local and global buyers looking for ethical suppliers.
- **Devolve & monitor compliance & supply chain risks collaboratively** across public, private & voluntary sectors.
- **Reduce your administration time:** focus on achieving better outcomes for suppliers and workers instead.
- **Increase your supply chain resilience:** access early indicators of supply chain failures used by the financial sector, usually found in non-financial data sets.
- **Prevent wheel-reinvention:** joining TISCreport will enable your other buyers to spend more with suppliers like you that help meet their UN Sustainable Development Goals commitments.
- **Join things up and reduce your risk:** the data that organisations need to manage their risks and compliance obligations is fragmented and held across numerous silos. Joining this up will prevent exploitation, save the planet **and** prevent the next Carillion\*.

*\*“Carillion used suppliers to “prop up a failing business model” and conceal true levels of debt, say MPs investigating the failed government contractor.”*

# Step 1: Set up your Supplier Compliance Dashboard

## Supplier compliance dashboard

Check compliance status of suppliers via one interface.

- Add your company to your workspace: <https://tiscroreport.org/workspace/default>
- [Upload your supplier list in csv format or manually](#) & check the compliance of suppliers via a dashboard.
- Benefit from collaborative due diligence efforts of buyers with overlapping supply chains across all sectors
- Add [free & discounted data streams](#) enabling your organisation to focus on what really matters.

## Step 2: Use our AI tools & third party Codes of Practice

### AI Modern Slavery Statement Analysis\*

Use our AI system to automatically check your modern slavery statement against the minimum compliance criteria stated within the Home Office Statutory Guidance.

You can also subscribe to the AI ratings of the statements of your in-scope suppliers and report this as part of your own modern slavery statement.

\*upgrade from freemium to access these and other features

### Access to partner codes of practice and charters

Access the suppliers complying with a growing number of codes of practice based on anti-slavery and transparency legislations.

London Mayor's Good Work Standard.

Greater Manchester Good Employment Charter

Good Employment Charter

[Welsh Government Ethical Employment in Supply Chains Code of Practice](#)

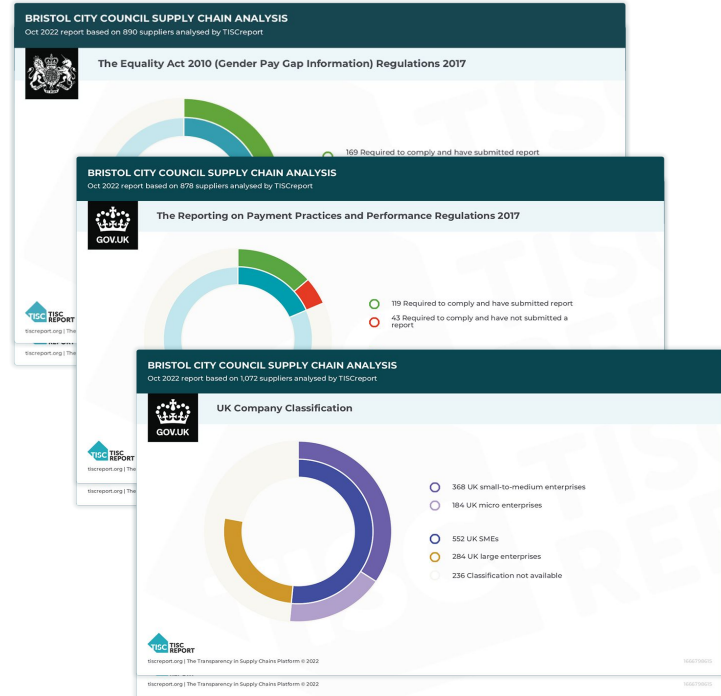

Good Work Charter Midlands

# Step 3: Demonstrate deeper supply chain insight in your future reports and statements by showing...

- MSA Compliance status of suppliers
- Living Wage Employer accreditation status of suppliers
- Supplier B-Corp & Social Enterprise Accreditation Status
- Compliance stats for your sector (by SIC code)
- The number of your buyers /clients whose transparency you are increasing
- Your impact on projects you work on in partnership with TISCreport and other key partners.

*Your aggregated summary statistics can also feed into your own Modern Slavery Statement.*

## Step 4: Onboard your suppliers with our support

### Supplier notifications

Notify suppliers that you are supporting their transparency by adding them to your dash.

Transparency is only meaningful if there is visibility in both directions. You can let suppliers know you care what they share via the platform and encourage them to save time on their compliance obligations whilst increasing supply chain transparency.

### Free supplier data onboarding support

We're on hand to help you import your spreadsheet data.

If you have a supplier list and don't know what to do with it take a look at the [101 how-to video](#) and if you still have any trouble get in touch via the TISCreport [online support desk](#).

# Step 5: Subscribe to contextual ESG data-sets you need for supplier due diligence assessments

## Environmental - Social - Governance

### UK ESG Indicators

...and many more

# Step 6: Simply automate your data imports

The screenshot displays a software interface with a table of 18 organisations. The table has columns for Name, Status, Jurisdiction, and Company ID. Three rows are visible, each with a 'Data linked' status. An 'Edit filters' dialog box is open, showing a list of filters under 'AVAILABLE' and 'APPLIED' sections. The 'AVAILABLE' section includes filters like 'Modern Slavery Act 2015 Section 54', 'Latest MSA statement compliance rating', 'Compliance performance factor', 'MSA compliance requirement', 'Latest MSA statement', 'The Reporting on Payment Practices and Performance Regulations 2017', 'The Equality Act 2010 (Gender Pay Gap Information) Regulations 2017', 'Gov UK: Financial sanctions targets', 'Company Information', 'Membership accreditations', and 'Imported data'. The 'APPLIED' section is currently empty. There is an 'Update filters' button at the bottom of the dialog.

Name	Status	Jurisdiction	Company ID
ACME CORPORATION	Data linked	UK	0938875
CHOAM	Data linked	UK	0763154
DHARMA INITIATIVE	Data linked	UK	0377698

- Automate regular syncing of suppliers via your accounts system, your CRM or e-procurement system
- Get your data cleaned quickly and easily Contact our helpdesk who can advise on data quality and integration.

**Get started on your workspace**

## Step 7: use our evidence base to support your ESG business case

Access research from our partners through TISCreport's Institute of Social Impact Research which provides you with the latest evidence-based insights to achieve meaningful social impact in the supply chain...

The Institute of  
**Social Impact
